IT Security Guide

Sample information security procedures

Training data notice: This is fictional sample content created for testing a multi-document retrieval-augmented generation (RAG) application. It is not a real company's policy or product documentation.

1. Account Security

- Use a unique password for each work account.
- Multi-factor authentication is required for email, source-code hosting, and financial systems.
- Never share passwords or one-time authentication codes with another person.

2. Device Safety

- Install operating-system and security updates within seven days of release, unless IT announces an exception.
- Lock the screen whenever leaving a workstation unattended.
- Lost or stolen company devices must be reported to the IT help desk immediately.

3. Data Handling

- Only store company documents in approved company storage services.
- Do not upload confidential company data to unapproved public tools.
- Report suspected phishing messages using the email client's report-phishing control.
