Customer Support Playbook

Sample support procedures and service targets

Training data notice: This is fictional sample content created for testing a multi-document retrieval-augmented generation (RAG) application. It is not a real company's policy or product documentation.

1. Ticket Priorities

- Priority 1 means a widespread outage or a complete loss of a critical service.
- Priority 2 means a major feature is unavailable but a workaround exists.
- Priority 3 means a limited issue affects a small number of users.

2. Response Targets

- The target first response time for Priority 1 tickets is 30 minutes.
- The target first response time for Priority 2 tickets is four business hours.
- The target first response time for Priority 3 tickets is one business day.

3. Escalation

- Escalate a Priority 1 ticket to the on-call engineer and support lead immediately.
- Add a concise timeline of customer impact and troubleshooting already attempted.
- Do not promise a resolution time unless the responsible engineering team has confirmed it.

End of sample document.
